<b>Office Action Summary</b>	<b>Application No.</b> 09/941,151	<b>Applicant(s)</b> CHAPOULAUD ET AL.	
	<b>Examiner</b> HEIDI M. EIDE	<b>Art Unit</b> 3732	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 9, 2008 has been entered.

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 120-132 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chishti et al. (5,975,893) in view of Lehmann et al. (6,575,751). Chishti et al. discloses a method of providing a custom orthodontic appliance for repositioning teeth of a patient comprising providing for display on a computer screen, with interaction by an operator (user), data of images of the teeth of the patient in suggested post-treatment tooth positions and orientations (final digital data set) based on three-dimensional information of the shapes of the teeth (column 5 line 37), receiving feedback information from a person (treating professional), other than the operator, and providing a custom orthodontic appliance configured to reposition teeth based on the suggested post-

Art Unit: 3732

treatment tooth positions and orientations. It is noted that the interactive step is written in the past tense, and interactivity can be interpreted as with the computer system.

Furthermore, there is suggestion as to various times when "users" can provide feedback as in information to modify (change) or accept (not change) tooth positions and orientations in obtaining post-treatment tooth positions and orientations (columns 4-7, 9-14). However, Lehmann et al. is used to teach a situation in which the person, treating professional, or orthodontic practitioner (dentist) does not have access to the computerized site and uses the services of another such as that of the operator, user, or laboratory, and interactivity is present in the method of providing a custom dental appliance. It would have been obvious to one of ordinary skill in the art at the time the invention was made to include the person who has interactively viewed a display of the images as understood as in Lehmann et al. in order to enable the person to save time and effort in communicating with the laboratory operator in view of Lehmann et al. As changes are incorporated, it is redisplayed.

### ***Response to Arguments***

Applicant's arguments filed December 9, 2008 have been fully considered but they are not persuasive. Applicant states that a supplemental declaration will be submitted to overcome the rejection; however, no such declaration has been received.

### ***Conclusion***

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the

Art Unit: 3732

application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

3. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action
